ANTI-RACIST INTERETHNIC NATIONAL ASSOCIATION

A tragedy in Bosnia

Alongside immigrants, solidarity and hospitality

Refugees who come from the Middle East, West Africa, Asia, who are trying to cross the borders are living in dramatic conditions, after having embarked upon endless journeys.

Trapped, without water or electricity, in camps of luck or in centres, they are in actual concentration camps. They are helped by a few volunteers, they are trying to survive, driven by the great hope of a better life. Italy illegally rejects refugees who seek asylum in Slovenia, which transfers them to Bosnia.

They have made enormous sacrifices hoping to reach a welcoming land, but unfortunately criminal organizations and murderous governments prevent them from standing a chance. Some of them are currently dying from the cold given the indifference of international and European institutions, who are hence, directly guilty of this crime. What they need is understanding and help, on the contrary they are met with hostility, all kinds of violence, incomprehension.

Their march carries on though; just like in other parts of the world, from Honduras to Libya, humanity on a journey is proof of tenacity and courage.

They need us. They need our support and the support of good-willed people.

This is the reason why people and independent associations who offer them their humane solidarity give us hope.

We unite with them relaunching an appeal to come together:

- **For hospitality which is complete and dignifying for those who seek asylum**
- **Against the repression and expulsion perpetrated by governments**
- **For freedom of movement, and the freedom to choose where to live**
